Instructions

Do all problems at the end of Chapter 1. Start EARLY --- there is a learning curve to climb with regard to the use of LaTeX.

VERY IMPORTANT : Please include the following line in your LaTeX preamble:

`\usepackage{hyperref}`

And then, substituting your unqunames (twice each) and your actual names (once each), use the following command to identify the authors:

**`\href{mailto:youruniquename@umich.edu,yourfrienduniquename@umich.edu,anotheruniquename@umich.edu}`
`{Your Actual Name (youruniquename@umich.edu), Your Friend's Actual Name (yourfriendsuniquename@umich.edu), Another Actual Name (anotheruniquename@umich.edu)}`**

See the LaTeX template file that I put on CTools for how this is done.

Please do NOT use any email that is not @umich.edu

Be sure to turn in your LaTeX source as well as compiled .pdf

Each team of 1-3 students (ALL taking the course for credit) should make one submission. Be sure to identify all teammates (name plus UM unique name) on the submission as indicated above.

Please refer to the syllabus regarding how late homework will be (harshly) treated.

Submission

This assignment allows submissions by attaching documents only.
